Qui	Titre	Crop	Quand	Comment	Sujet
Braverman M	HOOK SWD SPLAT		2019		<i>spotted wings Drosophila</i> , médiateur chimique
	Divers	Fire blight (<i>Erwinia amylovora</i>) Organic / Apples	2018		Copper octanoate, Phage (viruses that infect <i>Erwinia amylovora</i>), <i>Aureobasidium pullulans</i> strain DSM 14940 and <i>Aureobasidium pullulans</i> strain DSM 14941, <i>Bacillus subtilis</i> strain QST 713, <i>Bacillus amyloliquefaciens</i> strain F727, Omnilytics phage (In development) : Phage (viruses that infect <i>Erwinia amylovora</i>), Zinc, Buffer Protect: Citric acid, Disodium phosphate
	Divers produits		2017		GS-omega/kappa-Hxtx-Hv1a, <i>Anthonomus eugenii</i> Cano (Pepper Weevil) Pheromone, <i>Beauveria bassiana</i> Strain GHA; Pyrethrins
	MBI-012				Weeds/ All crops
	Divers produits	Stem gall wasp / Blueberry			Thyme oil extract, <i>Bacillus</i> , <i>Beauveria bassiana</i> Strain HF23, Calcium Polysulfides
	Divers produits	Black rot			<i>Bacillus amyloliquefaciens</i> strain D747, Copper octanoate, <i>Bacillus subtilis</i> QST 713 ; Potassium bicarbonate, Hydrogen Dioxide and Peroxyacetic Acid, <i>Bacillus amyloliquefaciens</i> strain F727, <i>Bacillus</i> spp. <i>Trichoderma</i> spp., <i>Bacillus mycoides</i> isolate J, Thyme oil, Rosemary oil, <i>Morinda Citrifolia</i> (Noni), <i>Nobactra</i> essential oil
	Bactériophage	Bacterial speck, spot, canker / tomato	2016		Naturally-occurring bacteriophage of <i>Xanthomonas campestris</i> pv <i>vesicatoria</i> and <i>Pseudomonas syringae</i> pv <i>tomato</i>
	Divers produits	Downy mildew / Organic spinach			Polyoxin D zinc salt, Potassium silicate, Copper octanoate, <i>Reynoutria sachalinensis</i> , <i>Bacillus amyloliquefaciens</i> strain F727, Citric acid
	Divers produits	Striped cucumber beetle/ Organic cucurbits	2015		<i>Beauveria bassiana</i> strain GHA, <i>Chromobacterium subtsugae</i> strain PRAA4-1T, Buffalo gourd root powder (feeding stimulant for beetles)

	Divers produits	<i>Downy mildew / Organic basil</i>		 	<i>Polyoxin D zinc salt, Potassium silicate, Copper octanoate, Reynoutria sachalinensis, Bacillus amyloliquefaciens strain F727, Citric acid</i>
	RNAi based technologies /all crops	<i>Noyers de type sauvage et résistants à la galle du collet</i>		 	Génétique
		<i>Virus and Viroid / Tomato (GH)</i>	2021
